ACCOMPLISHMENT REPORT

Generated: April 17, 2026

Sprint Period: April 13 – 18, 2026

PROJECT	PERIOD	STATUS
Recruitment Web Application	**April 13 – 18, 2026**	**In Development**

April 13, 2026 — Monday

- Recruitment Hub PIS form integrated
- Digital signing integrated
- Application form PDF export with signature integrated
- Redesigned the UI for applicant management

April 14, 2026 — Tuesday

- Implemented accounts creation
- Filtered job postings via accounts
- Implemented per-account reports and analysis for admin users
- Implemented required time duration and time allocation for job postings
- Integrated a recording functionality in the virtual interview rooms

MEETING / NOTES

- *Asked for preferences among the recruiters — personalized accounts and features to cater to their workflow.*
- *Update to be provided via email (Thursday) on their workflow for integration planning.*

April 15, 2026 — Wednesday

- Integrated suggested reports and analysis — per-account analysis and conversion rate
- Integrated endorsement status into the application process as a tracked status in the webapp
- Endorsement flow: applicants who finish assessment are endorsed by the recruiter to an OPS Validator account for final interview (scheduling pending integration)

MEETING / NOTES

- *Follow-up meeting with recruiters who missed the previous session — gathered additional feature preferences.*
- *Email update (Thursday) requested to finalize workflow integration planning.*

April 16, 2026 — Thursday

- Started backbone account creation for different recruiter account types (S!, A!, JC!, SY! — naming temporary)
- Started backbone account creation for OPS Validator accounts
- Implemented backbone of Master List for recruiter accounts
- Implemented backbone of interview form for recruiter accounts
- Reorganized dashboards to align with recruiter workflow demands
- Integrated transcription alongside recording in virtual interview rooms

April 17, 2026 — Friday

- Integrated Outlook scheduling on the webapp via endorsement in the final interview function
- Enhanced UX/UI further as requested by recruiters to suit their workflow
- Integrated Master List variables:

— *Inactive Applicants tab*

- Integrated per-account End of Day reporting for interviewers
